

**Illinois PTA Conferencing:
Powered by GlobalConference.com**

Here at the Illinois PTA communication is a key aspect in developing programs to better reach our children. In doing so we have teamed with GlobalConference.com to provide our members with the easiest, and cheapest, audio and web conferencing. By enrolling in this program you will receive special “members only” rates.

What is audio and web conferencing? GlobalConference.com audio conferencing provides you with a Toll and/or Toll-Free dial-in number and access code to host your own remote meetings. You simply provide your invitees with the dial-in number, access code, date and time of call. Web conferencing is software that allows you to present visuals, such as Power Point presentations, to your invitees during your conference call.

Conferencing saves on money and time associated with travel for in-person meetings, making it the greenest way for large groups to meet and collaborate productively.
